EDUCATION & CERTIFICATION

Amazon Web Services   **Dec, 2025 - Dec, 2028**
AWS Cloud Practitioner   *Verification: 02837414a9054e22b9567f24400a13d5*

College of San Benildo   **July, 2017**
Bachelor of Science in Information Technology   *GPA: 3.5/4*

▪ Relevant Coursework: Software/System Architecture, Operating Systems, Database Design and Computer Networks
▪ Capstone project web-based POS, implemented to local businesses, demonstrating practical application of my skills.

WORK EXPERIENCE

Aether   **Aug, 2022 – Present**
Senior Software Engineer   *Dubai, UAE*

▪ Led the migration of a key service from monolithic legacy system to serverless event-driven architecture using AWS Lambda, SQS, Kinesis, eliminating downtime and cutting costs while enabling continuous deployment
▪ Developed an internal AI campaign tool with Next.js and OpenAI GPT API, cutting campaign creation time by 70% and tripling weekly campaign output for marketing.
▪ Integrated the CCBill payment gateway to manage subscription renewals and in-app credit purchases, ensuring secure and reliable transaction processing.
▪ Implemented AI image anonymization feature to enhance user privacy and data security.
▪ Orchestrated development and deployment for 30+ Shopify stores using Liquid, React, and GraphQL, and automated CI/CD with GitHub Actions to standardize workflows and boost team efficiency
▪ Designing internal Retool apps and creating custom React components, accelerating internal application development by 80% and significantly improving operational efficiency.

NAFFCO   **Mar, 2021 – Jun, 2022**
Software Engineer   *Dubai, UAE*

▪ Developed scalable ERP/CRM systems supporting 8,000+ employees across 5 countries, achieving up to 200% sales growth using Laravel, SocketIO, Redis, and MariaDB/OracleDB.
▪ Integrated the CyberSource payment gateway to secure transactions, improve efficiency, and ensure compliance.
▪ Led infrastructure provisioning on AWS EC2 with Debian/Apache, and automated deployments and monitoring using custom bash scripts.
▪ Developed and maintained 30+ ecommerce platforms using Shopify, WordPress, and Magento, managing full development lifecycles from concept through deployment.
▪ Developed interactive touchscreen kiosks for major company events using Laravel and SocketIO, enhancing visitor engagement and digital interaction.

St. Mary's Catholic High School   **Aug, 2017 – Feb, 2021**
System Administrator and Web Developer   *Dubai, UAE*

▪ Developed custom internal tools for Teacher Evaluations and Event Registration using React.js and Node.js, streamlining administrative workflows and improving user experience.
▪ Developed and maintained the school website on WordPress, customizing themes and managing DNS to ensure high availability.
▪ Administered Google Workspace for 2,000+ users, providing daily support for Classroom, Drive, and Meet to ensure uninterrupted digital learning.
▪ Managed the iSAMS student information system, provisioning accounts and troubleshooting parent portal access to maintain accurate student records
▪ Configured and maintained the Cisco Meraki network, setting firewall rules to enforce safe browsing policies and provide reliable, campus-wide Wi-Fi supporting 1,500+ concurrent devices.
▪ Maintained all classroom AV equipment directly supporting daily teaching and major school events.

SKILLS

▪ Python (Django • FastAPI) • PHP (Laravel) • Node.js • REST/GraphQL APIs • Payment Gateways (CCBill • CyberSource)
▪ React • Vue.js • Next.js • TypeScript • JavaScript • Shopify • WordPress • Magento
▪ MySQL • PostgreSQL • MongoDB • Redis • WebSockets
▪ AWS (Lambda • Fargate • ECS • SQS • Kinesis • API Gateway • S3 • CloudFormation • EC2 • CloudFront)
▪ Git • Docker • Postman • Jira • Retool • OpenAPI/Swagger • Composer • NPM • Apache • Serverless Microservices
